

RBHS Counseling Department Vision Statement

RBHS students will understand the power of choice and self-responsibility. Every student will have access to tools, education and support in academics, social/emotional health and career paths to help them make informed decisions about their future. Every student will be respected by their counselors and will be advised/encouraged to collaborate, problem-solve, think critically, self-advocate and find balance as they pursue success through post-secondary opportunities.

RBHS Counseling Department Mission Statement

The counseling team at RBHS actively supports student autonomy by helping them, regardless of background or circumstances, to consider options and consequences as they face choices in their academic and personal lives. Information, tools and opportunities are communicated regularly through multiple platforms to all students so that they can make informed decisions about their futures. RBHS school counselors regularly promote collaboration, problem-solving, critical thinking and self-advocacy to students through individual planning, interventions and social/emotional development. We advocate for equity, access and a path to success for all students as we collaborate with stakeholders to provide programming that supports student needs and encourages all students to pursue excellence.
